PERSONAL PROJECTS

Personal Portfolio | Web development

- Developed a comprehensive personal portfolio website to showcase my projects, skills, and contact information. Features an interactive design, including animations and responsive layouts, to highlight my proficiency in web development technologies.

SPELCAST | Web development & Game development

- It is an innovative, fully responsive web platform that serves as a one-stop destination for gaming enthusiasts, offering them a range of exciting features. Users can download games, purchase gaming products and register for thrilling gaming tournaments.

E- Commerce Website | Web development

- Created a fully functional e-commerce site with features such as product listings, shopping cart, and user authentication. Implemented CRUD operations and utilized Firebase for efficient storage and management of user data, ensuring a seamless and interactive shopping experience.
